## Projects

### FLYING CHALKS

<https://flyingchalks.com/en>

**About:** The Flying Chalks web app developed in the Laravel 4 and MySQL database. It is a consulting website for students who are already studying abroad or want to study abroad.

**Technologies:** Laravel, PHP, MySQL, HTML, CSS, JavaScript, JQuery, Bootstrap

#### Overall, my contributions were:

- 1) I've implemented the admin panel where one can manage all the details related to students and respond to the queries.
- 2) I've integrated the application forms functionality based on different countries and implemented this module with the "Typeform" online tool.
- 3) Community chat functionality has been implemented where students can connect to the community members and discuss their queries.
- 4) Discounts module has been implemented and can be manageable from the admin section.
- 5) I've worked on the Groups functionality where the student can become a member of the number of groups.

### TREINER

<https://treiner.co/>

**About:** The Trainer web app is a marketplace for coaches to help players improve their skills on and off the field. Built in Laravel 5 and MySQL, it features admin panels for coaches and players to manage their details and sessions.

**Technologies:** Laravel, MySQL, PHP, Bootstrap

#### Overall, my contributions were:

- 1) I've built the backbone algorithm of this project where one can search for the coach and book an expert within his area, based on budget and availability.
- 2) The second major functionality I've implemented is the Job post feature, where any player can post a job with his specifications and the accredited and approved coaches can bid on, then the player will decide and get the best training available from a coach of his choice, at a competitive and fair price.
- 3) Also, I've implemented Google Analytics and Facebook pixel scripts for tracking purposes.
- 4) Built a set of reusable website components in standardized styles to allow for reuse and hyperperformant delivery.
- 5) Implemented the search functionality using Elasticsearch.
- 6) I've implemented the One to One and Group chat functionality where the coach can teach the players together in the same class or player can book coach for the one to one class.

## EHAI EXAMINATIONS

<https://examinations.ehai.ie/>

**About:** This website, part of the EHAI, supports teacher registration and exam creation for environmental health education at levels 1, 2, and 3, with both offline and online exam options.

**Technologies:** HTML, CSS, JavaScript, CodeIgniter (MVC framework), MySQL

### Overall, my contributions were:

- 1.) Implemented a user-friendly interface for teacher registration and exam creation.
- 2.) Enabled offline exams for levels 1 and 2, and online exams for level 3.
- 3.) Developed comprehensive post-exam functionalities such as adding students, sending notifications, inputting marks, and printing certificates.
- 4.) Ensured secure data handling and efficient database management.
- 5.) Optimized performance and responsiveness across various devices.

## SAFEFOOD FOR LIFE

<https://safefoodforlife.com/>

**About:** This website, part of Safefood, helps trainers manage food safety exams at levels 1, 2, and 3, ensuring high standards through education and certification.

**Technologies:** HTML, CSS, JavaScript, CodeIgniter (MVC framework), MySQL

### Overall, my contributions were:

- 1.) Created a streamlined process for trainer registration and exam creation, ensuring ease of use.
- 2.) Enabled offline exams for levels 1 and 2, and online exams for level 3, providing flexibility and accessibility.
- 3.) Developed comprehensive post-exam functionalities such as adding students, sending notifications, inputting marks, and printing certificates.
- 4.) Implemented robust data security measures and efficient database management to protect sensitive information.
- 5.) Ensured full responsiveness and optimization for various devices, enhancing user experience.

## NATIONAL THEATRE

<https://www.ntlive.com/>

**About:** National Theatre Live broadcasts world-class theatre productions to cinemas around the globe. Bringing the best of British theatre to international audiences, NT Live allows viewers to experience acclaimed performances from the comfort of their local cinema.

**Technologies:** Php, Zend2, MongoDB, MySQL, HTML, CSS, JavaScript, JQuery, Bootstrap.js, Third party apis, Payment gateway

### Overall, my contributions were:

- 1) Write server-side scripting in Zend.
- 2) Client Communication.
- 3) UI Implementation & Integration

## THE DONKEY SANCTUARY DONATION PLATFORM

<https://dd.thedonkeysanctuary.ie/>

**About:** The Donkey Sanctuary Ireland rescues and rehabilitates donkeys, providing lifelong care and promoting their humane treatment through education and advocacy.

**Technologies:** HTML, CSS, JavaScript, CodeIgniter (MVC framework), MySQL

### Overall, my contributions were:

I created a robust donation platform for The Donkey Sanctuary. Key achievements include:

- 1) Developed a user-friendly direct debit donation form.
- 2) Implemented an admin panel for downloading donation details in CSV format.
- 3) Provided ongoing support for updates and maintenance.
- 4) Ensured secure data handling and efficient database management.
- 5) Optimized the platform for performance and responsiveness across various devices.

## PAYMENTS CUH (CHILDREN'S HEALTH IRELAND)

<https://payments.cuh.ie/>

**About:** CUH Payments provides a secure and convenient way to manage and make payments for services at Cork University Hospital.

**Technologies:** HTML, CSS, JavaScript, CodeIgniter (MVC framework), MySQL

### Overall, my contributions were:

I developed a versatile donation platform for Payments CUH. Key achievements include:

- 1) Created a system for handling in-patient and accident & emergency donations.
- 2) Integrated the Global Payments gateway for secure debit card transactions.
- 3) Provided ongoing support and regular updates.
- 4) Ensured secure data handling and efficient database management.
- 5) Optimized the platform for performance and responsiveness across various devices.

## CRANIOFACIAL E-REFERRAL FORM

<https://www.craniofacial.ie/cranio/>

**About:** Craniofacial Ireland supports individuals and families affected by craniofacial conditions through services, awareness, and education. The website offers information, support networks, and updates on research and treatments.

**Technologies:** WordPress, Elementor, PHP, HTML, CSS, JavaScript, MySQL

### Overall, my contributions were:

- 1) Implemented a secure referral form submission system for General Practitioners (GPs).
- 2) Enabled encrypted email communication for securely receiving referral forms.
- 3) Developed a system for parents to submit images and additional details through a secure link.
- 4) Ensured data encryption and decryption using the GNUPG Extension.
- 5) Optimized the system for usability and performance across various devices.

## SHOP.EATINGONADIME

<https://shop.eatingonadime.com/>

**About:** Eating on a Dime offers affordable meal planning resources, including meal plans, recipes, and budget-friendly cooking tips. The site is dedicated to helping families save money on groceries while enjoying delicious and nutritious meals.

**Technologies:** Shopify, AJAX Libraries API, Shopify Pay, PHP

### Overall, my contributions were:

1. It's a small eCommerce store with around 20+ products in total
2. The product categories include Coffee Mugs, Aprons, Shirts, Digital Cookbooks
3. Currency preference
4. Mobile friendly

## MUTTS

<https://mutts.com/>

**About:** The "Mutts" project was built in WordPress and MySQL. The idea behind this web app is to sale the products online for the pets where end-users can also customize most of the products according to their choices.

**Technologies:** Wordpress, MySQL, HubSpot, Google Analytics, and Woocommerce.

### Overall, my contributions were:

- 1) I've implemented the front end templates with a set of reusable website components in standardized styles to allow for reuse and hyper-performant delivery.
- 2) I've worked on the website optimization and implement the "WebPack" throughout the website to bundle all scripts. Also, I've used a few plugins to improve the Google PageSpeed Insights.
- 3) The Google Analytics and GTM have been implemented in the backend and tracking scripts have been added in the payment pages from where admin can keep track of the transactions and other

## SPORTIFICO

<https://www.sportifico.com/>

**About:** Sportifico is the social network for aspiring football players and coaches. Here is your chance to connect with people who are building their sporting careers. I've developed this portal from scratch using WordPress, HTML5, CSS3, and jQuery with pixel-perfect implementation in mind and a lightning-fast. I built this website for a new sports social network.

**Technologies:** Wordpress, MySQL, PHP, Bootstrap

### Overall, my contributions were:

- 1) I've built the backbone algorithm of this project where one can search for the player or coach and send the friend request to connect with him or her.
- 2) I've built a module where end-user can create his/her sports resume including professional information, career history, and statistics.
- 3) Players and Coaches can post the news and more than that to enhance the social network. It helps to put them in a spotlight and other users can reach out.
- 4) I've implemented Chat functionality, where players and coaches can connect and create opportunities.
- 5) I've also developed the module where a coach can manage his team, schedule matches, and practice sessions. He can communicate with his team in group channels.

## MATCHA SOURCE

<https://matchasource.com/>

**About:** I built a beautiful, responsive WooCommerce storefront for Matcha Source, a retailer of matcha tea and accessories. I've implemented the theme from scratch using provided PSD designs and HTML code.

**Technologies:** Wordpress, Javascript, Ajax, PHP

### Overall, my contributions were:

- 1) I've successfully migrated thousands of customer records, orders, and active subscriptions from the existing store.
- 2) I've implemented the payment gateways for users to quickly, easily, and securely pay using the PayPal APIs.
- 3) I achieved the required functionality by integrating and heavily customizing several WordPress plugins including SearchWP, FacetWP, myCRED, Elementor, and many more.
- 4) I also developed a custom child theme for the site and integrated a number of third-party services.

## MODELLS

<https://www.modells.com/>

**About:** Modell's Sporting Goods offers a wide selection of athletic apparel, footwear, and sports equipment. Committed to providing quality products for all sports and fitness enthusiasts, Modell's aims to help customers perform their best and enjoy an active lifestyle.

**Technologies:** Shopify, Salesforce Commerce Cloud, Shopify Pay, Apple Pay

### Overall, my contributions were:

This one is a Shopify store to sell sports, exercise and fitness related accessories.

1. It has multiple payment gateways integrated in it with Google Analytics for tracking user behavior. 2. It has a community page too. It's mobile friendly and contains all eCommerce modules.
3. The shop categories include Sports & Activities , Footwear, Apparel, Accessories, Fan Shop, Top Brands, Sale & Clearance
4. Integrated Salesforce Commerce Cloud in it

## DOCTOR ON DEMAND

<https://doctorondemand.com/>

**About:** The Doctor on Demand web app developed in the Wordpress and MySQL database. Patients can connect with doctors over live video, with an average wait time under 10 minutes.

**Technologies:** Wordpress, MySQL, JavaScript, jQuery

### Overall, my contributions were:

- 1) I've developed a custom plugin where Doctors can post the availability time for the patients to book them.
- 2) I've also implemented a module where doctors can post their thoughts and end-users can subscribe to the news feeds.
- 3) I've integrated the application forms functionality based on different countries and implemented this module with the "Typeform" online tool.
- 4) Discounts module has been implemented and can be manageable from the admin section

## VACATION RENTALS

<https://www.alltherooms.com/>

**About:** The "Vacation Rentals" project was built in ROR and React JS. The idea behind this web app is an end-user can search, compare, and save on vacation rentals and hotels from all the best sites.

**Technologies:** MongoDB, React, Redux , ROR

### Overall, my contributions were:

- 1) I've created a new front end based on React JS and Redux with a set of reusable website components in standardized styles to allow for reuse and hyper-performant delivery.
- 2) I've worked on the website optimization and implement the "WebPack" throughout the website to bundle all scripts.
- 3) The search destination module has been implemented with the use of filters and end-user can compare the prices and facilities and decide to book.

## TRADDLE

<https://traddle.in/>

**About:** Traddle offers an online platform to businesses in the export-import arena, thus acting as trade facilitator or digital broker for parties involved in bulk trading of agro-commodities around the world.

**Technologies:** React Native, Node JS.

App Store: <https://apps.apple.com/us/app/homee-on-demand-pro/id1078802410>

Play Store: [https://play.google.com/store/apps/details?id=homee.consumer.droid&hl=en\\_IN](https://play.google.com/store/apps/details?id=homee.consumer.droid&hl=en_IN)

## FRAGILEX

<https://fragilex.org/>

**About:** The "FragileX" project was built in WordPress and MySQL. The idea behind this web app is to provide unwavering support for every family affected by Fragile X, while relentlessly pursuing a cure.

**Technologies:** Wordpress, MySQL, HubSpot, Google Analytics, and FacetWP.

### Overall, my contributions were:

- 1) I've implemented the front end templates with a set of reusable website components in standardized styles to allow for reuse and hyper-performant delivery.
- 2) I've worked on the website optimization and implement the "WebPack" throughout the website to bundle all scripts. Also, I've used a few plugins to improve the Google PageSpeed Insights.
- 3) I've created a module called 'MyFX Research Portal' with the use of plugin FacetWP where enduser can filter the conferences and other details based on selected values

## DCU TRUST DONATION FORM

<https://dcuedtrust.ie/>

**About:** The DCU Educational Trust supports Dublin City University by funding scholarships, research, and capital developments. It aims to enhance the university's impact through philanthropy and engagement with alumni, friends, and partners.

**Technologies:** HTML, CSS, JavaScript, WordPress, MySQL

### Overall, my contributions were:

I developed a custom donation form for DCU Trust. Key achievements include:

- 1) Implemented support for one-off, recurring, and direct debit donations.
- 2) Integrated the Stripe payment gateway for secure transactions.
- 3) Ensured secure data handling and efficient database management.
- 4) Provided ongoing support for updates and maintenance.
- 5) Optimized the form for performance and responsiveness across various devices.

## BARNARDOS DONATION SYSTEM INTEGRATION

<https://www.barnardos.ie/>

**About:** Barnardos Ireland is a leading children's charity dedicated to transforming children's lives through care, support, and advocacy. Committed to providing essential services, Barnardos works to ensure that every child has the opportunity to reach their full potential.

**Technologies:** HTML, CSS, JavaScript, WordPress, MySQL, React.js

### Overall, my contributions were:

I integrated a third-party donation system into the Barnardos website. Key achievements include:

- 1) Implemented the donation functionality using React.js for a dynamic user experience.
- 2) Ensured secure data handling and efficient database management.
- 3) Provided ongoing support for updates and maintenance.
- 4) Optimized the system for performance and responsiveness across various devices.
- 5) Ensured seamless integration with existing website infrastructure.

## MARIE KEATING DONATION PLATFORM

<https://mariekeating.ie/>

**About:** The Marie Keating Foundation is dedicated to promoting cancer awareness and providing support for those affected by cancer. Through education, community outreach, and support services, the Foundation aims to improve cancer care and empower individuals in their health journeys.

**Technologies:** HTML, CSS, JavaScript, WordPress, MySQL

### Overall, my contributions were:

- 1) Supported single and recurring donations using the Stripe payment gateway.
- 2) Integrated data push functionalities to the M-hance CRM for donation, contact, and event booking information.
- 3) Ensured secure data handling and efficient database management.
- 4) Provided ongoing support for updates and maintenance.
- 5) Optimized the platform for performance and responsiveness across various devices.

## HOTLINE REPORTING SYSTEM INTEGRATION

<https://hotline.combinedmedia.com/>

**About:** Hotline is dedicated to combating illegal content online, particularly child sexual abuse material. By providing a secure and anonymous reporting platform, Hotline helps protect vulnerable individuals and supports law enforcement in removing harmful content from the internet.

**Technologies:** HTML, CSS, JavaScript, WordPress, MySQL, React.js, Core PHP

### Overall, my contributions were:

I integrated a robust reporting system into the Hotline website. Key achievements include:

- 1) Implemented an anonymous reporting form using React.js and Core PHP.
- 2) Ensured secure data handling and efficient database management.
- 3) Enabled reporting functionalities for intimate image abuse (IIA) with required contact information.
- 4) Provided ongoing support for updates and maintenance.
- 5) Optimized the system for performance and responsiveness across various devices.

## FRESHPET

<https://www.buyfreshpet.co.uk/>

**About:** Freshpet UK offers fresh, all-natural pet food made from real ingredients. Committed to the health and well-being of pets, Freshpet provides nutritious meals that are gently cooked and kept refrigerated to maintain freshness.

**Technologies:** Odoo, HTML, CSS, JavaScript, Stripe Payment Integration, Responsive Design

### Overall, my contributions were:

- 1) Designed and customized the online store using Odoo Website Builder.
- 2) Implemented secure payment integrations for smooth transactions.
- 3) Managed product listings and order processing functionalities.
- 4) Ensured the website's performance and responsiveness across different devices.
- 5) Provided ongoing support for site updates, maintenance, and feature enhancements.
